ABDELRHMAN ALAA
Angular / MEAN Stack Developer

Giza, Egypt   abdoalaa2146@gmail.com   (+20)1150384702   [Portfolio](#) [GitHub](#) [LinkedIn](#)

SUMMARY

Front End Angular Developer with professional experience. Skilled in building scalable, responsive applications with Angular and modern web technologies. Familiar with backend development through MEAN stack projects. Strong problem-solving skills and a passion for performance optimization and clean UI development.

EXPERIENCE

Ashal Network – *Full Time*   *November 2024 – Present*

Front End Developer

- Transferred a large-scale project UI into **Angular v19** applications with fully responsive designs.
  Integrated REST APIs ensuring efficient communication with backend services.
  Collaborated with backend developers to deliver secure and scalable system features.

Mutqana– *Part Time (remote)*   *October 2025 – Present*

Front End Developer

Project: Tredo (Shipping & Logistics System)

- Contributed to the development of an Angular v19 logistics management system with modules for Orders, Shipments, Couriers, Warehouses, Finance, Wallets, and CRM.
- Developed responsive dashboards and data-driven UI components for merchants and customers.
- Collaborated with backend developers to ensure efficient workflows.

PROJECTS

ERP System (Company Project)   [Live Demo](#)
- Built a large-scale ERP system with **over 25 modules** for business operations.
- Implemented role-based access and PDF, Excel reports for export.
- Integrated **Firebase Cloud Messaging** for real-time notifications across the system.

Education Platform (Company Project) [Live Demo](#)
- Developed dashboards for students, teachers, and admins with course management features.
- Built progress tracking, exams, discussion forums, and interactive UI tools.
- Integrated real-time notifications and **WebRTC** private chat for communication.

Chat & Video Calls Web App - *Angular, Socket.IO, Node.js, MongoDB*   [GitHub](#) | [Live Demo](#)
- Developed Full Stack real-time chat and peer-to-peer video calling.
- Implemented real-time messaging & video calling with **Socket.IO**.

FilmLog (Letterboxd Clone) — *Angular, Firebase, TMDB API*   [GitHub](#) | [Demo](#)
- Users authenticate, track favorites, rate movies, and create watchlists.

- Integrated TMDB API for movie data, cast info, search, and trailers.

E-Commerce + Dashboard — *MEAN Stack*   [GitHub](#) | [User Demo](#) | [Admin Demo](#)
- Authentication, product browsing, shopping cart, purchase workflow.
- Built admin dashboard for inventory and order management.

CERTIFICATIONS
